

ELSHOPO CABINET BOOK THE SILK-SCREEN LABORATORY

After 6 months working non-stop via skype between Berlin, Tokyo, Paris and Briançon, the artist collective Elshopo finally releases its catalog, a genuine bible of non-conventional silk-screening.

Contents: 240 pages filled with sparkling and unreasonable experiments around this medium, and a dazzling panorama of various projects carried out in the last 7 years: silk-screen on pancakes or mortadella, crazy happenings, mobile silk-screen workshop, silk-screen machines, printing guitars, not to mention the good old stickers and the D.I.Y. T-shirts.

The book also includes several writings by artists and curators (translated from French into English and Japanese) which illuminate the complex and prolific output of this group of artists founded in Grenoble in 2001. As a bonus, **this edition includes a full screen-printed manual of 16 pages**, integrated at the end of the book, which enables everyone to become familiar with this technique and to build up his own workshop at home.
